Re: Financial Future Planning

As with all grant programs, there is always an element of “cost matching”. In December, we applied for a grant with the EPA within the Diesel Emissions Reduction Act (DERA). This cost match (25 EPA/75 NTFD) was more of a burden than I like, but I wanted to see if they would support an idea. This past week, they notified us of receipt of the grant. They will give us \$219,325, if we permanently retire one of our 2009 engines and purchase a new fire truck. An award of \$219,325 is great, but it is still approximately \$500,000 away from a new fire truck.

We cannot absorb \$500,000 in our current budget, so our plan is to lease/purchase a Type 1/3 Wildland Urban Interface Engine. These types of fire engines are not as expensive as a typical structural fire engine and it would allow us more functionality in our Wildland Environment. This could also allow us additional missions during a deployment.

The Officers met with our Diesel Emissions Reduction Act Project Manager, and we are excited for this opportunity. However, in the scope of financial prudence, we want to discuss this opportunity with the Board of Trustees. Please come to the Board Meeting prepared to discuss the potential of updating one of our Fire Engines.

Sincerely,

A handwritten signature in black ink, appearing to read "Kevin Nunn".

Kevin Nunn, Fire Chief

BOARD OF TRUSTEES

Rick Pollock - Board Chair * Mark Herrera - Vice-Chair * Steve Manzione - Treasurer * Scott Bissegger * Kurt Stephensen
